

Outdoor audio solutions for every project

Outdoor spaces are a natural extension of the home, creating a place to relax, entertain, and spend time with family and friends. With the right outdoor audio solutions, these environments can be transformed into immersive spaces where music enhances every moment. Beautifully integrated soundscapes help bring outdoor areas to life, elevating the atmosphere and enriching the overall outdoor living experience.

Landscape Applications

Landscape speaker systems designed to deliver balanced, immersive sound across outdoor spaces. Discreet satellite speakers blend naturally into the garden, while in-ground subwoofers add powerful low-frequency performance. Scalable system designs make it easy to create the right audio coverage for projects of any size.

Patio 4.1

4 satellite speakers
1 in-ground subwoofer

Garden Series 8.1

8 satellite speakers
1 in-ground subwoofer

8.1 Landscape Series

8 satellite speakers (100 Volt)
One LS12T In-Ground Subwoofer

Rock Series

Sonance Rock speakers and woofers blend seamlessly into landscapes and hardscapes, delivering high-quality audio while remaining discreetly hidden from view. Their organic shape and natural finish integrate effortlessly into outdoor environments, while protected internal connections and an IPX4 rating ensure durability against UV, heat, wind, rain, and splashes.

Weather-resistant woofer cones with Santoprene surrounds deliver warm bass, and the speakers are available in two sizes and natural granite or brown finishes to suit different outdoor settings.

Available models: RK83, RK10W, RK63

Surface Mount Applications

Surface mount outdoor speakers provide a flexible and reliable solution for patios, terraces, and outdoor living areas. Designed for durability and easy installation, they deliver powerful, high-quality sound while blending seamlessly with exterior walls and architectural features. Ideal for targeted listening areas where discreet yet impactful audio is required.

Mariner MX Series

The Sonance Mariner MX Series delivers powerful outdoor sound for patios and terraces. With an IP66 weather-resistant rating and small, medium and large models, the series offers flexible solutions for a wide range of outdoor applications.

Available models: MX86, MX66, MX62, MX56, MX52, MX62 SST, MX52 SST

Wedge X Series

The James Wedge WX Series is designed for 90° corner applications, offering improved performance and flexible installation. The angled enclosure directs sound into the listening area, making it ideal for outdoor spaces requiring precise audio coverage.

Available models: M42Q, W43Q, W52Q, W53Q

OMNI-6T

The Sonance OMNI-6T is an omnidirectional outdoor speaker that delivers 360° sound coverage, perfect for evenly filling gardens, terraces, and outdoor spaces with high-quality audio. Its discreet, partially buried design blends seamlessly into landscaping, while a 6.5" woofer and four 1.25" wide-band drivers provide clear mids and highs with balanced bass. Built to last, its weather-resistant enclosure and IP66 rating ensure reliable performance in all outdoor conditions.

360° sound

Architectural Applications and Marine Audio

Visual Experience Series Extreme

The Visual Experience Series Extreme is engineered for premium audio in the most demanding environments. With a durable, weather-resistant design rated for temperatures up to 90°C, these speakers are ideal for indoor and outdoor installations. Available in 6" and 8" in-ceiling and in-wall models, including single stereo and subwoofer options.

Available models: VXXT6, VXXT6R, VXXT6R SST, VXXT8R, VXXT8RW and VXXT10RW.

VXQ Series from James by Sonance

The VXQ Series delivers high-performance architectural audio for demanding installations. Featuring the Quadratech tweeter with Cymatic diffuser, these speakers provide wide, balanced dispersion with exceptional clarity. With marine-grade aluminum construction and an IP67 rating, they are built for reliable performance in both indoor and outdoor environments.

Available models: VXQ48, VXQ68 and VXQ88 (In-wall and In-Ceiling Models)
